

Section 18 Person to Weapon Relationship

First purchaser: Fpurc	18-3
Person killed with this weapon: WUser	18-4
Weapon killed this person: WusedOn	18-4

First purchaser: Fpurc

Name	Definition
Fpurc	Identifies whether the person (victim or suspect) was the first purchaser of the gun

Uses

This data element will be used by sites working with a law enforcement agency and the Bureau of Alcohol, Tobacco and Firearms (ATF) to conduct traces on guns used in fatalities. Traces establish the first purchaser and the place of purchase. The data element summarizes trace results by identifying whether the victim or suspect in a case was the first purchaser of the gun. The data can be used, for example, to help identify shooters who obtained their guns from the secondary market. It can identify victims who used their own guns to kill a suspected criminal in self-defense or whose own guns were used against them in a homicide.

Discussion

This variable is triggered only in cases in which a trace has been successfully completed. It is completed for each person in the case to indicate whether they or a person sharing their surname or address was the first purchaser.

Data Standards or Guidelines

NVISS

Person killed with this weapon: WUser**Weapon killed this person: WUsedOn**

Name	Definition
WUser	Did this person use this weapon (either against another person or against him or herself)?
WUsedOn	Was the weapon used to kill this person?

Uses

“WUser” links the person with the weapon or weapon type they chose. “WUsedOn” links the victim to the weapon used to kill the victim. The variables also indirectly link victims to suspects.

Discussion

The intention of “WUsedOn” is to capture the use of weapons by both suspects and suicide victims. In the case of a single suicide, indicate the victim. If the incident involves multiple suspects, it may be difficult to determine which suspect actually used the weapon or weapon type to cause the injury. In this case, code unknown for “WUser”.
